🐙 GitHub 🌐 LinkedIn 📄 LeetCode

Cybersecurity Profile

BCA 2nd year student with strong hands-on experience in cybersecurity fundamentals, offensive security labs, and security analysis. Completed 200+ labs on TryHackMe covering web exploitation, networking, Linux, and defensive concepts. Familiar with industry tools and secure coding practices, with additional background in web development. Seeking a Cybersecurity Internship (SOC / Security Analyst / Blue Team) to apply practical skills and learn from real-world security operations.

Cybersecurity Skills

Core Security Concepts: Networking, Linux, OWASP Top 10, Secure Coding, Threat Analysis

Hands-on Practice: 200+ labs completed on TryHackMe (Beginner to Intermediate)

Security Tools: Burp Suite, Wireshark, Nikto, Aircrack-ng, Bash Scripting

Operating Systems: Linux (Kali Linux), Windows Basics

Programming & Scripting: Python, JavaScript, Bash

Problem Solving: Active on LeetCode (logic & fundamentals)

Security & Technical Projects

TryHackMe Labs & Practice

2024–2025

- Solved 200+ hands-on labs covering web vulnerabilities, networking, Linux privilege escalation, and enumeration.
- Practiced identifying common vulnerabilities such as XSS, SQL Injection, and misconfigurations.

AI Code Reviewer — Security-Aware Tool

2025

- Built a tool that analyzes code logic and highlights potential issues from a secure coding perspective.
- Improved understanding of how insecure code patterns can lead to vulnerabilities.

Internship & Practical Exposure

Cybersecurity Analyst — Deloitte (Virtual Internship)

2024

- Completed real-world inspired cybersecurity simulations involving threat analysis and risk assessment.
- Learned how security teams assess risks and protect organizational assets.

Cybersecurity Job Simulation — Tata

2024

- Worked on simulated enterprise security scenarios and foundational cyber defense tasks.

Education

Babu Banarasi Das University, Lucknow

2024–2027

Bachelor of Computer Applications (BCA)

Certifications & Learning

- Cisco Ethical Hacking Fundamentals 2024
- AWS Certified Cloud Practitioner (CLF-C02) — In Progress 2025
- Continuous hands-on learning via TryHackMe 2024–2025
